

MPS18A

Description

The Plus Audio MPS-18A is a high-performance subwoofer engineered for superior low-frequency output and durability in a range of professional audio settings. Its robust construction and advanced features make it an excellent choice for live sound reinforcement and fixed installations.

Key Features:

- Powerful Bass Performance: Featuring a single 18? driver, the MPS-18A delivers a powerful 2000W RMS with an impressive maximum SPL of 134dB, providing deep, impactful bass from 30Hz to 110Hz.
- Durable Construction: The cabinet is constructed from high-quality birch plywood and finished with a polyurea coating, offering resistance to corrosion, wear, and water. This ensures excellent weather resistance and longevity.
- Flexible Connectivity: Includes two combo XLR inputs for versatile signal connections, and a 35mm stand pole socket for flexible mounting options.
- User-Friendly Interface: A 2.4-inch colour screen provides easy access to essential settings, including a cardioid preset for optimized low-frequency output and cancellation.
- Robust Design: The cabinet's design ensures durability and consistent performance, making it suitable for demanding environments and extended use.

The MPS-18A by Plus Audio represents a powerful and reliable solution for enhancing low-frequency performance in a variety of audio applications, combining robust build quality with advanced features for exceptional sound reinforcement.

Meta Fields

Features:

- Components 1 x 18"
- SPLmax 135dB
- 2.4" Colour Display

Specification:

Max. SPL calculated

Frequency response 40 Hz – 120 Hz Power amp output 1000W (RMS)

(peak power)

Amp type Class D

Low-/mid speaker 18"

Display 2.4" colour display

Pole mount Compatible with standard

35mm mounting pole

Dimensions (WxHxD) 69.5 x 60.5 x 66.0 cm
